

Atra

CNC PLASMA, OXYFUEL & WATERJET CUTTING SYSTEMS

MADE IN THE U.S.A.

The **Alltra** Advantage

We are committed to the success of our customers and we have a desire to see American fabricators continue to be the benchmark of quality around the world. That is why every Alltra machine is manufactured with the customer in mind and is built to the highest quality standard. Each machine is designed to produce the highest quality parts every time.

Using the latest plasma, oxyfuel, fiber laser and waterjet cutting technologies, Alltra machines can be configured quickly and customized for special applications. Cutting complex shapes from sheet to thick plate, tube and pipe with an Alltra machine redefines precision-cut parts.

The Alltra Difference

- 1+ years warranty
- 24/7 Customer service available
- Installed by Alltra from the floor up

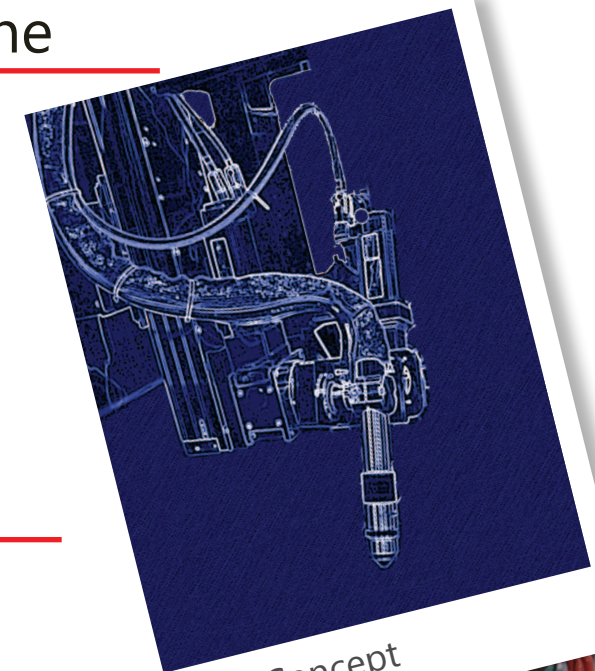

The Alltra Product Line

- PG14
- PG30
- Pipe
- Waterjet
- Tube
- Bevel

Alltra Features

- Inkjet marking
- Plasma/waterjet combination platform
- Drilling
- Tube and pipe cutting
- Multi-torch beveling
- Plasma marking
- Custom table design & manufacturing
- Custom machines

From Concept

To Reality

Alltra Service

Alltra Corporation was founded on a need to produce American-made custom quality machine tools. Located in the heart of the US, Alltra's facility spans over 100,000 ft². The quality of the company is backed by its dependable team with well over 100 years of combined engineering and manufacturing experience. Alltra craftsmen take pride in the designing, building and final installation of each machine. The Senior Technician assigned to a project is responsible for the electrical assembly, installation, start up, training and commissioning of the cutting system. This close customer relationship is a valuable asset to Alltra and our customers, thus in keeping with our promise:

Integrity. Sincerity. Service.

Other Alltra Services

Going beyond design and manufacturing of Alltra machines to:

- Remanufacture existing equipment
- Retrofit current machines with controls, drives & processes
- Service any manufacturer's existing equipment
