ALLtra CNC Control

Introducing the ALLtra CNC

The **ALLtra CNC** is the most advanced CNC Controller available today for thermal cutting technology! It is a PC based CNC that has been designed with your needs in mind-rugged, reliable, user friendly and productive. A control truly built for steel fabricators and plate processors.

Manufactured with performance in mind, the ALLtra CNC is equipped with a Dual Core 2.26GHz CPU package and Solid State hard drive combining both power and efficiency. When quality production counts ... you can count on all the **ALLtra CNC**.

When you pair with the new ALLtra CNC control with **ALLtra's Heavy Duty Precision PG14 and PG30** series gantry's, you get the most advanced and reliable cutting machine technology available on the market today! When developing this product we kept our focus on our traditions and philosophy; that being on you and your parts and how to get the most out of our machine. It is truly designed with production in mind making the **CNC** controller truly the next dimension in thermal shape cutting.

Specifications:

- 2.26 GHz Dual Core Pentium MCPU
- Solid State 40GB Drive (SSD)
- 1GB DDR3 Ram
- The Motion and operating system will be split between the (2) CPU cores with improved software performance
- 4 USB Ports
